Technical Skills

Programming Languages : Javascript, Typescript, C#, PHP, Python, Java

Technologies/Frameworks: React.js, ExpressJs, NodeJs, Laravel ,Git, REST APIs, ASP.NET Core , Entity Framework , Nest Js, Prisma, Next js

Developer Tools : Visual Studio Code, Github, Postman API

Databases : MongoDB , MySQL, PostgreSQL

Personal Projects

File sharing website | ([Repository](#))

- Built a real-time peer-to-peer file sharing application using **Next.js**, **NestJS**, **TypeScript**, **WebRTC**, and **WebSockets**.
- Implemented direct browser-to-browser file transfers with **PeerJS/WebRTC**, reducing the need for files to pass through the server.
- Used **Socket.IO/WebSockets** to coordinate real-time connections and peer sessions between users.
- Added a **QR code** connection flow to let users quickly connect devices and start sharing files.

Salis | ([Repository](#))

- Built a full-stack delivery management platform using **Next.js**, **NestJS**, **TypeScript**, **PostgreSQL**, and **Prisma**, supporting Shop Owners, Delivery Companies, Drivers, and Admins.
- Designed a relational database and **REST API** architecture for users, products, orders, drivers, delivery companies, order items, and delivery workflows.
- Implemented **JWT** authentication and role-based **authorization**, providing different functionality and dashboards based on user roles.
- Developed an end-to-end order and delivery lifecycle, including pickup-code verification, delivery status tracking, payment states, and failed/returned deliveries.
- Built a responsive Arabic/English interface with **RTL** support, interactive dashboards, maps, and data visualizations.

Slap | ([Repository](#))

- Built a Slack-inspired real-time collaboration platform using **React**, **Express**, **MongoDB**, **Clerk**, and **Stream Chat**.
- Implemented public and private channels, member selection, invitations, and **real-time** messaging with Stream Chat.
- Integrated user authentication and chat user synchronization with Clerk and Stream, including token generation and automatic membership in public channels.
- Added collaboration features such as channel management, member management, pinned messages, and video communication.

Certificates

- Microsoft Certified: Azure Data Fundamentals
- CS50x Introduction to Computer Science

Education | Alzaytoonah university

B.Sc in Software Engineering

Relevant Coursework : OOP, Data Structures, Algorithms, Database System, System and design analysis, Computer Systems, User Interface Design, Linear Algebra, Discrete Mathematics, Calculus
